1 SETTINGS

The look setting is made by modifying the properties file and creating the applications necessary for the well function of your home page.

The file is located in the directory:

```
org/silverpeas/util/viewGenerator/setting/waves.properties
```

This part of the project is essential to allows each element of the platform associated with the right block, and the right application (existing or to be created).

1.1 Process

Each time SILVERPEAS is updated, you have to report your modifications in the *CustomerSettings.xml* file in the directory : `SILVERPEAS_HOME/setup/settings` , this way, they become permanent.

In All this document, `/weblib` refers to the `SILVERPEAS_HOME/data/web/weblib.war` directory.

1.2 Header elements

Paramètre	Valeur par défaut	Commentaires
